consists of 16 contiqs. The true order of the pieces
is not known and their order in this sequence record is
arbitrary, tags between the confliqs are represented as
runs of N, but the exact sizes of the gaps are unknown.

```

```
arbitrary, Gaps between the contids are represented as
runs of N, but the exact sizes of the gaps are unknown.
This record will be updated with the finished sequence

    (see http://www.hiseliomiter.od/Sock/Sochaskidialt_data.html)
    NotE: This is a 'working draft' sequence. It currently

                                                                                                                                                                                                                                    consists of 72 conties. The true order of the pieces is not known and their order in this sequence record is
                                       be preserved.
                                                                              as soon as it is available and the accession number will
8883; contid of 8883 bp in length
